

COVID-19 Security Risks

What Can We Do?

- Be suspicious of links in emails, text messages, **social media posts**, and email attachments.
 - *Hover your mouse arrow over a link before clicking to see the real website address.*
 - *Avoid clicking on shortened website addresses like <http://tinyurl.com/website>*
- Do *not* provide usernames, passwords, or financial information to anyone unless you have verified their identity, or you have initiated contact.
 - For example, the IRS will not email or call you for your SSN, they communicate via the USPS.
 - Your bank will not email or call you for your account password or PIN.
- Visit **trusted websites** for current information on COVID-19 and related issues: www.cdc.gov, www.naccho.org, and www.cisa.gov
